

ES Series
ELECTRIC SCISSOR LIFTS

On-board Fault Code Display

Get instant feedback on the status of your machine. An on-board display provides a visual indicator without the need for the analyzer, reducing troubleshooting time.

Platform Cable

An efficiently placed cable, secured with plated steel fasteners, doesn't interfere with operator's work.

Deck Extension

Redesigned to keep debris from interfering with the extension.

Cast Wheels

Thicker, heavier cast wheels are even more resistant to abusive operation.

Smarter Design Reduces Operating Costs

Only two hoses and four fittings mean fewer leaks, improved reliability and reduced scheduled service requirements.

Easy Access

Slide-out battery trays with steel covers are one of many features to facilitate servicing.

Built from corrosion-resistant, high quality aluminum, the deck features non-skid strips for less slip and more grip for the operator.
